## Profile Summary

- A goal-oriented professional with over **2 years** of experience as a Senior Consultant at Bristlecone in **SAP MM** functional modules.
- Possess strong skills in Procurement, showcasing expertise in implementing procurement processes, understanding procurement requirements, and excelling in configuration activities.
- Enhanced operational activities by **fostering strong relationships** with key stakeholders to drive organizational success.
- Proficient in leveraging **SAP MM functionalities** to optimize procurement processes, streamline inventory management, and enhance supply chain efficiency, resulting in cost savings and improved operational performance.
- Familiarity with SAP's ASAP & Activate Methodology and proficient in business process analysis, mapping, EWM, PP and SAP configuration.
- Documented, configured, and customized Material Master, Vendor Master, Purchase Info Record, and Condition Types in SAP.
- Excelled in analytical thinking, rapid learning, and problem-solving, fostering a collaborative team environment to thrive in fast-paced settings.

## Work Experience

### 1. Senior Consultant | Bristlecone India Limited (MM Module) | June 2022 to February 2024 | Pune (Hybrid)

#### Responsibilities:

- Spearheaded data extraction, transformation, and loading (ETL) initiatives using LTMC, ensuring data integrity and alignment with strategic IT objectives across SAP systems.
- Managed the implementation of **asset subcontracting processes**, customizing solutions to reduce procurement lead times.
- Configured **Cost Centre procurement**, enabled direct material procurement against cost centers.
- Implemented **SAP MM-FI integration** to streamline procurement-related financial transactions, ensuring accurate financial reporting and compliance.
- Streamlined procurement of various materials like coal, dye, chemicals, yarn, and spare parts to meet client expectations.
- Collaborated with teams to configure **Freight Configuration POC** within project timelines.
- Provided immediate support to client production issues during Hypercare.
- Led the configuration of automatic account assignment, plant creation, and MRP controller, ensuring alignment with strategic IT objectives and facilitating user acceptance testing (UAT) for system enhancements.
- Participated in preparing configuration documents and functional specification documents for RICEFs.
- Customized and focused on Purchasing and Master Data related to purchasing.

#### Achievements:

- Enhanced vendor consignment activity, reducing manual effort and increasing process **efficiency by 20%**.
- Automated the conversion of Intra **Stock Transport Requests (STR)** into Intra Stock Transport Orders (**STO**), enhancing operational efficiency.

- Technical Assistance
- Procurement Processes
- SOPs Implementation
- Market Research
- Vendor Evaluation
- Budget Analysis
- Quality Control
- Inventory Management

## Certifications

Web Assessment: Customer On-Boarding overview for **SAP S/4HANA Cloud** from SAP

Web Assessment: SAP Signavio for RISE with **SAP S/4HANA Cloud**, private edition from SAP

Web Assessment: CPEA and SAP Build in RISE with **SAP S/4HANA Cloud** for Sales from SAP

## Technical Skills

Category	Software
ERP Packages	SAP R/3 ECC 6.0, S/4 HANA 2021
Operating System	Windows
Other Packages	MS-Office

- Implemented vendor consignment processes, increased inventory visibility, and achieved cost savings for clients.
- Reduced lead times **and costs by 10%** through optimized import procurement procedures for the client by strategic sourcing, integrating automated import documentation in SAP.
- Configured pipeline procurement processes for direct material consumption in production, improving operational efficiency.
- Provided production support **post Go-live activities** and Hypercare support in Procurement.
- Arranged special procurement processes like project procurement and service procurement.

### Projects:

#### Project Title: Implementation Project

Client : Trident Group  
Duration : July 2022 to May 2023  
Role : SAP MM Functional Consultant  
Environment : S/4 HANA 2021

#### Project Title: Roll-out, Enhancement and Production Support

Client : Arab Bank  
Duration : June 2023 to January 2024  
Role : MM Consultant  
Environment : SAP S/4 HANA 2021

### 2. Technical Assistant | Ayeena Developers & Constructions Private Limited | November 2016 to December 2019 | Bhubaneswar

#### Responsibilities:

- Designed HVAC system, pipeline, and water supply layouts to meet industry standards and project needs.
- Implemented **standard operating procedures** (SOPs) for procurement processes ensuring consistency and adherence to best practices across projects.
- Conducted **market research** to identify potential vendors, evaluating their capabilities and assessing their suitability for project requirements.
- Assisted in the development of project budgets by providing material quantity take-offs and cost analysis of various systems.
- Conducted **vendor performance evaluations** to uphold quality, schedules, and contracts implementing necessary corrective measures.
- Implemented **quality control** measures for incoming materials, ensuring compliance with industry standards.
- Supported the optimization of **inventory management** practices, minimizing excess stock levels and reducing holding costs.

#### Achievements:

- Implemented standardized procurement procedures, ensuring consistency and efficiency across projects.
- Delivered 10% cost savings through precise material estimations and cost analyses for HVAC, pipeline, and water supply systems, optimizing project budgets.
- Achieved 20% reduction in excess stock and 15% decrease in holding costs through optimized inventory management, leading to substantial cost savings.
